USE AI TO YOUR ADVANTAGE

ReallyEasy.AI

Consulting

Unlock the Potential of AI with ReallyEasy.AI: Your Partner for Tailored AI and Machine Learning Solutions. We specialize in crafting and streamlining AI and ML operations to power your business forward.

Certifications

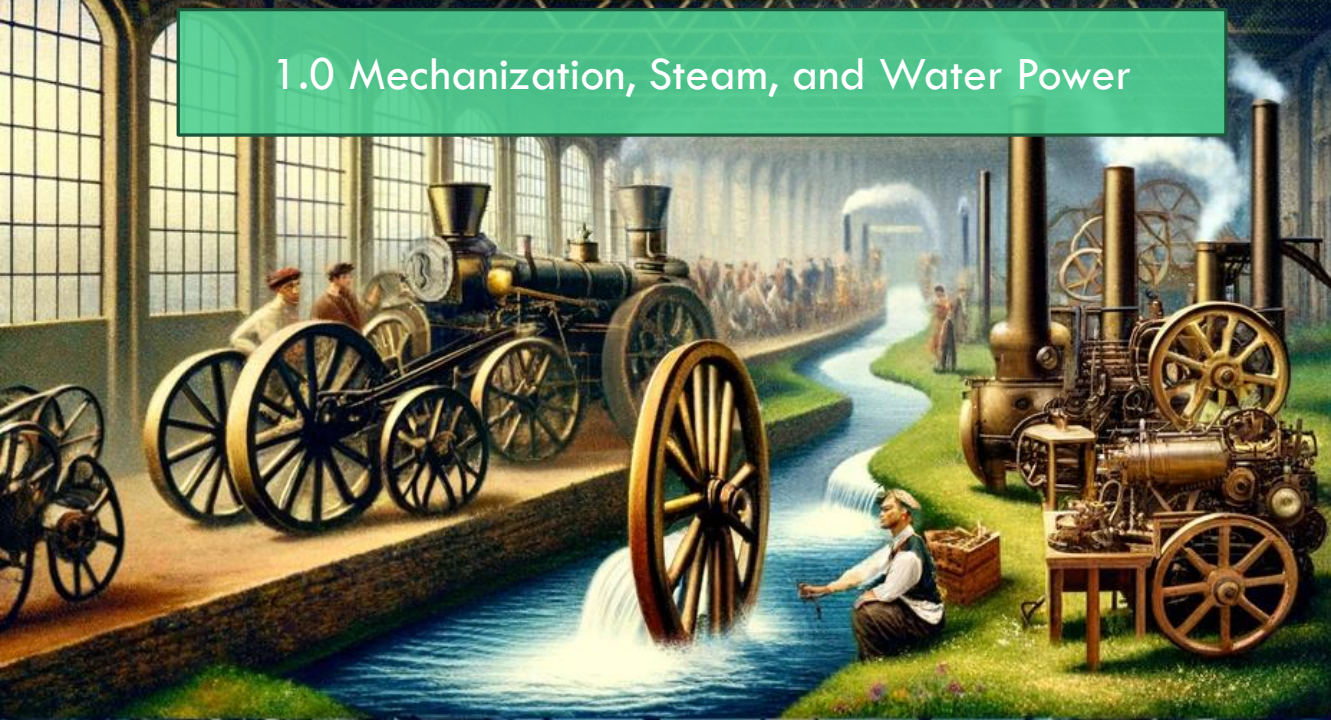

Elevate Your Business with Certified Expertise from ReallyEasy.AI. Our team boasts professionals with prestigious certifications such as AWS Machine Learning, Azure Data Scientist, and Azure AI Engineer. This diverse and recognized skill set ensures that we bring the most current and effective AI solutions to your business challenges. Trust us to deliver excellence and innovation, leveraging our certified expertise to drive your success.

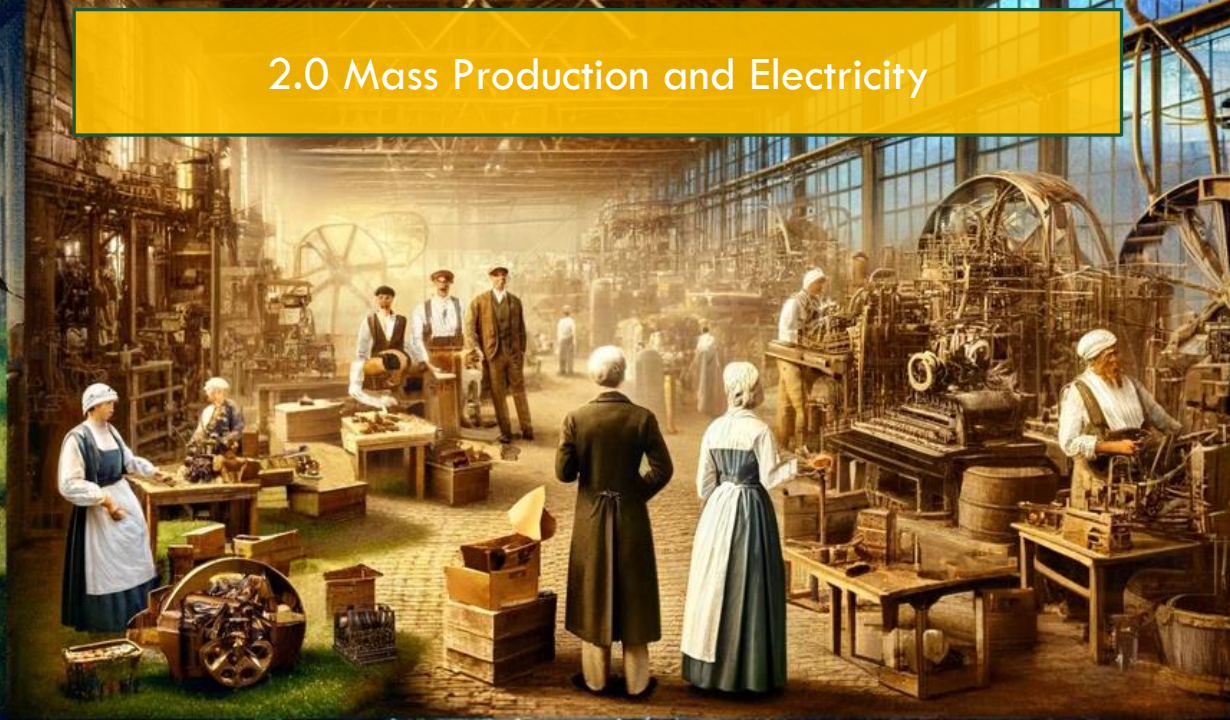

Training

Empower Your Future with ReallyEasy.AI Training: Dive into the World of AI and Machine Learning. Our interactive workshops are designed for hands-on learning, offering direct engagement with cutting-edge AI technologies. Whether you're a beginner or an advanced learner, our expert-led sessions provide the tools and knowledge to transform your understanding and application of AI.

1.0 Mechanization, Steam, and Water Power

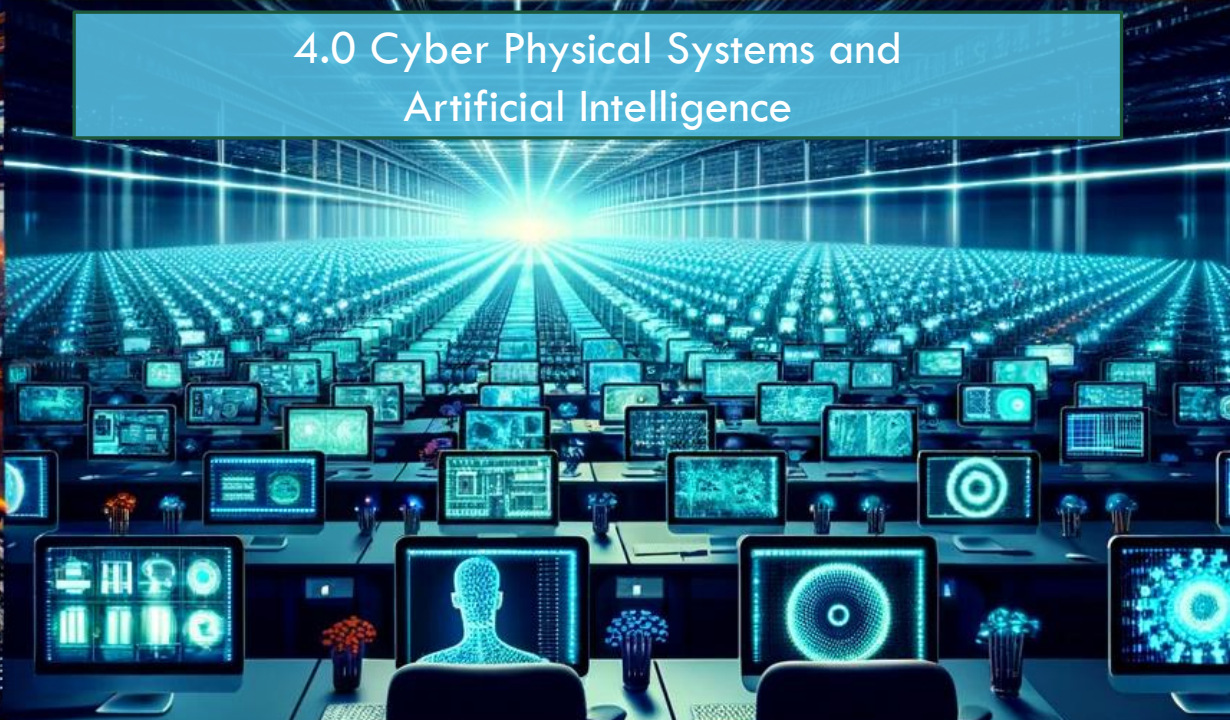

2.0 Mass Production and Electricity

3.0 Electronic / IT Systems and Automation

4.0 Cyber Physical Systems and Artificial Intelligence

THE TECH JOB MARKET IS BRUTAL RIGHT NOW

Below you'll find a comprehensive list of all the known layoffs in tech that have occurred in 2023, to be updated monthly. If you have a tip on a layoff, contact us [here](#). If you prefer to remain anonymous, you can contact us [here](#).

The running total of layoffs for 2023 based on full months to date is 224,503, [according to Layoffs.fyi](#). Tech layoffs conducted to date this year currently exceed the total number of tech layoffs in 2022, according to the data in the tracker.

- January: 89,554 employees laid off — [see all January 2023 Tech Layoffs](#)
- February: 40,021 employees laid off — [see all February 2023 Tech Layoffs](#)
- March: 37,823 employees laid off — [see all March 2023 Tech Layoffs](#)
- April: 20,014 employees laid off — [see all April 2023 Tech Layoffs](#)
- May: 14,928 employees laid off — [see all May 2023 Tech Layoffs](#)
- June: 10,958 employees laid off — [see all June 2023 Tech Layoffs](#)
- July: 10,589 employees laid off — [see all July 2023 Tech Layoffs](#)
- August: 9,545 employees laid off — [see all August 2023 Tech Layoffs](#)
- September: 4,632 employees laid off — [see all September 2023 Tech Layoffs](#)
- October: 7,331 employees laid off — [see all October 2023 Tech Layoffs](#)

Navigating the 2024 Tech Job Market: Insights and Strategies Amidst Predicted Layoffs

As we approach 2024, the tech job market is undergoing unprecedented shifts shaped by the rise of artificial intelligence (AI), data analytics, and cybersecurity. However, alongside this tech evolution, there's a predicted wave of layoffs. Understanding this landscape is crucial for both professionals and employers, especially in the realm of technical recruiting.

The Unfolding Layoff Landscape

The tech industry witnessed a staggering surge in global layoffs, surpassing 240,000 in just one year, marking a 50% increase from 2022. Major industry players like Google, Microsoft, Meta, and Amazon are embracing AI investments while simultaneously downsizing their workforce, raising concerns about the impact of automation on human labor.

Tech Layoffs in 2023: A Prelude to 2024

Recent layoffs, including those at LinkedIn, Cisco Systems, and Epic Games, point to a continued trend in the coming year. As companies strive for operational efficiency and cost reduction, the narrative of "right-sizing" staff levels echoes across various sectors, including tech and related industries.

Navigating the Future: Trends and Recommendations Embracing Specialized Skills

In this evolving landscape, professionals seeking to future-proof their careers must focus on specialized skills in data-focused, AI-centric, and security-related roles. These areas are rapidly becoming not just beneficial but essential for staying relevant in the job market.

"Some people can read 'War and Peace' and come away thinking it's a simple adventure story.

Others can read the ingredients on a chewing gum wrapper and unlock the secrets of the universe."

Gene Hackman as Lex Luthor - Superman the Movie (1978)

USING CHATGPT TO FIND, GET, AND KEEP A JOB

MAKE THE MOST OF YOUR AI TIME INVESTMENT

PERSONAS

MAKING SURE YOU HAVE THE RIGHT EXPERT

PERSONAS

Default (GPT-3.5)

You are an expert in recruiting and resume consulting with over 20 years of experience. Do you understand?

Yes, I understand. While I am not a human with personal experiences, I have been trained on a diverse range of data, including information about recruiting and resume consulting up until my last knowledge update in January 2022. I can certainly assist you with information, advice, and tips related to recruiting and resume writing based on the knowledge available up to that point. How can I assist you today?

RESUME ADVICE

MAKE SURE YOUR RESUME IS UP TO SPEED

RESUME ADVICE

Default (GPT-3.5)

CO

You are an expert in recruiting and resume consulting with over 20 years of experience. I need your help with making sure my resume looks good to prospective hiring managers.

Of course, I'd be happy to help you with your resume! To get started, could you provide me with some details? Here are a few questions to guide us:

1. What industry are you in, and what type of position are you targeting?
2. Could you share your current resume or provide a summary of your education, work experience, and key skills?
3. Are there any specific concerns or challenges you've encountered in your job search that you would like to address in your resume?
4. Do you have any specific job postings or companies in mind that you're targeting?

Feel free to share as much information as you're comfortable with, and we can work together to enhance your resume and make it stand out to prospective employers.

COVER LETTERS

NEVER, EVER APPLY WITHOUT A COVER LETTER

COVER LETTERS

Default (GPT-3.5)

You are an expert in recruiting and resume consulting with over 20 years of experience. I need you to look at a job description and my resume then create a cover letter that will make me attractive to hiring managers.

Certainly! I'd be happy to help. Please provide me with the job description and your resume so that I can tailor a cover letter for you. If there are specific points in the job description you'd like to highlight or address, let me know as well.

PORTFOLIO BUILDING

SHOW OFF YOUR SKILLS

PORTFOLIO BUILDING

Default (GPT-3.5)

CO

You are an expert in web development with over 20 years of experience. I need to build up a portfolio so I can get hired as a web developer. Come up with a plan and projects that I should consider for my portfolio.

Certainly! Building a strong portfolio is crucial for showcasing your skills and landing web development opportunities. Here's a plan and some project ideas to consider for your portfolio:

Portfolio Development Plan:

1. ** **Assess Your Skills:

- Identify your strengths and areas for improvement.
- Decide on the technologies you want to focus on (e.g., HTML, CSS, JavaScript, front-end frameworks, back-end languages, databases).

2. ** **Create a Personal Brand:

- Design a personal logo and choose a color scheme that reflects your style.
- Develop a consistent visual identity across your portfolio and social media.

INTERVIEW PREP

ACE THE INTERVIEW WITH AI

INTERVIEW PREP

Default (GPT-3.5)

You are an expert web developer and recruiter with over 20 years of experience. I'll give you my resume and a job description and then I need you to ask me questions as if you were giving me the interview for the job.

Absolutely, I'd be happy to help simulate a job interview for you. Please provide me with your resume and the job description, and we can get started.

ON THE JOB

AI DOESN'T END ONCE YOU GET THE JOB

ON THE JOB

Default (GPT-3.5)

CO

You are an expert web developer with over 20 years of experience. I have been given an assignment to create an interface for a Cosmos DB backend data store. Help me come up with a plan and what the design should look like.

Certainly! Creating an interface for a Cosmos DB backend involves several steps, including planning, design, and implementation. Here's a high-level plan and some design considerations to help you get started:

Planning:

1. Understand Requirements:

- Clarify the functional and non-functional requirements of the interface.
- Identify the types of data stored in Cosmos DB and how they will be accessed.

2. Define User Roles:

- Identify different user roles (e.g., administrators, regular users) and their specific needs.

3. Authentication and Authorization:

- Decide on the authentication mechanism (e.g., Azure AD, JWT).
- Implement role-based access control to restrict access based on user roles.

4. Choose a Technology Stack:

- Decide on the front-end framework (React, Angular, Vue.js, etc.).
- Choose a back-end technology if needed (Node.js, ASP.NET Core, etc.).

Design:

1. User Interface Design:

- Create wireframes or mockups for the user interface.
- Ensure a responsive design for various devices (desktop, tablet, mobile).

UNDERSTANDING DIFFICULT CONCEPTS

GETTING YOUR HEAD AROUND A SUBJECT

UNDERSTANDING DIFFICULT CONCEPTS

Default (GPT-3.5)

co

You are an expert in web development with over 20 years of experience. Explain Angular to me like I was a 5 year old

co

Sure, I'd be happy to explain Angular in a simple way!

Imagine you're building a toy house. Now, to make this toy house, you need different parts like walls, windows, and doors. Angular is like a magical toolbox that helps you build your toy house on the computer.

In this toolbox, there are special tools that make it easy for you to create different parts of your toy house and connect them together. These tools help you make sure that everything works smoothly, just like when you play with your toy house.

Angular also helps you update and change things in your toy house without messing up the entire structure. It's like having a special magic wand that lets you make your toy house look and behave just the way you want it to.

So, in simple terms, Angular is like a magical toolbox for building things on the computer, making it easier for developers to create and manage websites or apps.

co

Now explain it to me like I was in grade school.

co

Alright, imagine you're in charge of organizing a big school play. Angular is like the director's toolkit for making sure everything runs smoothly.

In this toolkit, you have special tools for creating different scenes, characters, and actions in the play. These tools help you build each part of the play and connect them together, just like how Angular helps developers build different parts of a website or app.

Now, what's cool about Angular is that it helps you manage the play without chaos. If you need to change a scene or a character's line, Angular makes it easy to update without messing up the whole play. It's like having a director's script that guides everyone on what to do, making sure the play is a hit!

So, in grade school terms, Angular is like a director's toolkit that helps developers organize and build websites or apps smoothly, just like you'd organize and run a fantastic school play.
